The Lynden Sculpture Garden offers programs for young people that integrate the sculpture collection with the natural environment to create a unique hands-on experience of art in nature. Art activities focus on 3D artmaking—though we will also do plenty of painting, drawing and collaging—and an age-appropriate understanding of media, processes and techniques. Nature programs make extensive use of the grounds to create a joyful outdoor experience.

Financial aid is available; awards are based on need.

## SCHOOL'S OUT WORKSHOPS

Looking for something to do when school isn't in session?

Ages 6-11

\$60 / \$52 members

9 am-4 pm (late pick-up available)

### *Fractals*

Available dates: September 25, October 13,  
November 3, November 7

A fractal is a never-ending, infinitely complex pattern made by repeating a simple process over and over again. Nature is full of familiar fractals—trees, rivers and clouds—as are mathematics and art. Spend the day at Lynden discovering fractals on the land and creating your own fractal art project.

### *Bones*

October 31

Late autumn is marked in several cultures by holidays that celebrate the continuity of life and death: Día de los Muertos, Halloween, All Souls' Day. We will explore bones and skeletons in the natural world, and will create *calaveras*, Mexican-inspired skeleton figures.

### Schedule Your Own Workshop

Are your kids off school on a day when we aren't providing a workshop? If you can assemble a group, we're happy to provide a School's Out Workshop that fits your schedule.

## HOMESCHOOL DAYS

## EDUCATORS' FREE DAY

Saturday, October 18, 12-5 pm

The Lynden Sculpture Garden welcomes educators to visit without charge and to learn more about our place-based PK-12 education programs. These programs connect students and teachers with art and nature through tours, field trips and classroom visits.

## TOURS

Lynden offers docent-led and self-guided tours from May through October. Choose between *Art as an Avenue to EcoAwareness* and a tour that introduces students and teachers to the sculpture of several major 20th-century artists. Consider staying for a picnic lunch or outdoor drawing session.

## FIELD TRIPS

Lynden's year-round field trips focus on outdoor inquiry and hands-on learning. They address state standards in art and science, common core standards in speaking and listening, and DPI performance standards for environmental education.

- Art field trips combine mini-tours with hands-on artmaking. Topics include *Observation*, *Sculpture Construction Techniques*, and *Animals*, *Symbols* and *Sculpture*.
- Nature field trips explore the ecology of our site in each season and conclude with an art project that reflects the day's discoveries.

## CUSTOMIZED PROGRAMS

Bring the sculpture garden to your classroom prior to a tour or field trip, or integrate your specific curricular needs into a visit to Lynden.

## EXHIBITIONS

+ Opening receptions are free and open to the public.

***Inside | Outside***

**Nancy Popp & Paul Druecke**

**Through October 26**

The *Inside/Outside* series explores Lynden's evolution from private residence to public institution, and in this latest installment **Nancy Popp** (Los Angeles) and **Paul Druecke** (Milwaukee) use visual markers—lines, paths, stencils and engraved stones—to reimagine Lynden's history and spaces.

***Urban Wood Encounter***

**November 9, 2014-January 25, 2015**

**Opening reception: Sunday, November 9, 3-5 pm +**

The landscape at Lynden is dotted with more than 600 trees. There were, at one time, many more: the majority of the elms on the grounds were lost to Dutch elm disease. Now, with the emerald ash borer making its way into southeastern Wisconsin, we think a lot about how to turn our ash trees into a sustainable resource. *Urban Wood Encounter*, now in its fourth year, is designed to introduce the public to the environmental value of urban wood within the context of an exhibition of fine furniture. Urban wood comes from the trees that line our streets, shade our homes, and define our parks—trees that are not harvested for their timber value but instead often find their way into landfills when they succumb to age, injury or disease. In an effort to advance the sustainable recovery and the best use of the products of urban forests, *Urban Wood Encounter* challenges furniture makers and designers to create inspiring, thoughtful, and beautiful furniture from this regionally abundant and underutilized natural resource.
